Project Proposal & Literature Review

[TODO: Project Title]

[TODO: Student A Full Name] **[TODO: Student B Full Name]**
[TODO: Student C Full Name]

Milestone 1 — **[TODO: Date]**
[COURSE CODE] — Digital Image Processing

Abstract

[TODO: 3–5 sentences: what problem are you tackling, why does it matter, what is your planned approach, and what public dataset/baseline will you use. Write this last.]

1 Problem Statement & Motivation

[TODO: What image-processing problem are you solving? Why is it interesting or useful? How does it connect to material from the course (name the week/topic)? 1 paragraph.]

2 Related Work

[TODO: Summarize at least 4 references, at least 2 of which should be from 2023–2026. Use the table below as a starting organizer, then write 1–2 paragraphs of prose connecting them to your plan.]

Table 1: Key references.

Reference	Year	Relevance to this project
(?)	2024	**[TODO: one sentence]**
(?)	2018	**[TODO: one sentence]**

3 Dataset & Baseline Plan

[TODO: Name the public dataset(s), give exact size/subset you will use, and the license. State exactly which baseline (classical or prior learned method) you will reproduce and compare against.]

4 Proposed Method

[TODO: Sketch your planned approach: architecture diagram or pseudocode, what is novel or extended relative to the baseline, and why you expect it to work.]

Table 2: Dataset summary.

Dataset	Subset used	Link
[TODO: name]	[TODO: e.g., 800 train / 100 val crops]	[TODO: URL]

5 Feasibility & Compute Plan

[TODO: State your compute tier (CPU-OK / GPU-light), expected training time per experiment, and confirm this fits a laptop-class machine within the project window.]

5.1 Minimum Viable Deliverable (MVP)

[TODO: The smallest version of this project that still produces a valid, reportable comparison against the baseline.]

5.2 Stretch Goal

[TODO: What you will attempt if the MVP is on track by Week 5–6.]

6 Risk Assessment

- [TODO: Risk 1 and its mitigation / fallback.]
- [TODO: Risk 2 and its mitigation / fallback.]

7 Work Breakdown

Table 3: Milestone task allocation (see also the project catalog entry for this project).

Milestone	Student A	Student B	Student C
M1 (Wk 3)	[TODO: task]	[TODO: task]	[TODO: task]
M2 (Wk 6)	[TODO: task]	[TODO: task]	[TODO: task]
M3 (Wk 9)	[TODO: task]	[TODO: task]	[TODO: task]
